Product Data Sheet

BU Powder Coatings

Interpon D1036 SG RAL9006 MT GREY Product Code: SW10AN

Product Description

Interpon D1036 SG RAL9006 MT GREY is a standard durable powder coatings specifically formulated without TGIC, for use on architectural aluminium components. Providing new levels of weathering resistance Interpon D1036 SG RAL9006 MT GREY surpasses the performance of all leading architectural powders. It offers significantly higher gloss retention and resistance to colour change combined with maximum film integrity to ensure long term cosmetic and functional protection. The Interpon D1036 SG RAL9006 MT GREY has been awarded the prestigious Qualicoat, Class 1 approval for standard durable architectural powder coatings and conforms to the requirements of EN12206 (high durability systems).

Powder Properties

Chemical type Polyester **Gloss** 60-75

Particle Size Suitable for electrostatic spray

Density 1.600 ±0.1 g/cm³

Storage Dry cool conditions under 30°C

Shelf life 12 months Sales Code S series

Stoving schedule at 200°C: 10 min

(object temperature)

Test Conditions

The results shown below are based on mechanical and chemical tests which (unless otherwise indicated) have been carried out under laboratory conditions and are given for guidance only. Actual product performance will depend upon the circumstances under which the product is used.

Substrate Aluminium (0,8mm Al Mg1)

Pretreatment Chromate Film Thickness 60-80 microns

Stoving 10'/200°C (object temperature)

Mechanical Tests

 Adhesion
 ISO 2409 (2 mm Crosshatch)
 0

 Erichsen Cupping
 ISO 1520 and Qualicoat Class1
 Pass Qualicoat Class1

 Hardness
 ISO2815
 >80

Chemical and Durability Tests

Issued: 15/12/2014

Salt Spray ASTM B117-85 Pass – No corrosion creep

(1000 hours)

(1000 hours) more than 2.0 mm from scribe

Minimum blister rating 8.

Acetic Acid Salt Spray ISO 9227 Pass-<16mm corrosion/10cm (1000 hours)

Constant Humidity ISO 6270 Pass – No corrosion area >1mm from scribe

Sulphur Dioxide ISO 3231 Pass – No blistering or loss of gloss or

(Kesternich) Discoloration

Permeability Pressure Cooker Pass- No defects after 1 hour

EN12206-1:2004 (2 hours boiling water)
Part 5.10

ndia

Chemical and Durability

Tests (Continue)

Generally good resistance to dilute **Chemical Resistance**

acids.

Alkalis and oils at normal temperatures.

EN12206-1:2004 **Mortar Resistance** No effect after 24 hours

Part 5.9

Exterior Durability ISO2810 Exceeds Qualicoat Class1 requirements

12 months Florida

Color Stability at **Elevated temperatures** Excellent

Pretreatment

For maximum protection it is essential to pretreat architectural components prior to the application of Interpon D1036 SG RAL9006 MT GREY. Aluminium components should receive a full multi-stage chromate conversion coating or a suitable chrome-free pretreatment to clean and condition the substrate. Detailed advice should be sought from the pretreatment supplier.

Application

Interpon D1036 SG RAL9006 MT GREY can be applied by manual or automatic electrostatic spray equipment. For solid shades, unused powder can be reclaimed using suitable equipment and recycled through the coating system. For mixed colors and certain special effect finishes, advice must be sought from the manufacturer, as to the suitability or otherwise of the product for recycling. Certain special effect finishes may not be suitable for recycling. For all mixed color/special effect systems, advice must be sought as to the correct mixing ratio for virgin/reclaim powder.

Safety Precautions

Please consult the Material Safety Datasheet (PC010) copies of which are available on request.

Disclaimer

The information given in this sheet is not intended to be exhaustive and any person using the product for any purpose other than that specifically recommended in this sheet without first obtaining written conformation from us as to the suitability of the product for the intended purpose does so at his own risk. Whilst we endeavour to ensure that all advice we give about the product (whether in this sheet or otherwise) is correct we have no control over either the quality or condition of the substrate or the many factors affecting the use and application of the product. Therefore, unless we specifically agree in writing to do so, we do not accept any liability whatsoever or howsoever arising for the performance of the product or for any loss or damage (other than death or personal injury resulting from our negligence) arising out of the use of the product. The information contained in this sheet is liable to modification from time to time in the light of experience and our policy of continuous product development
